## INTRODUCTION

- The project includes the web application which will supply information about all the famous things. Ex- food,places,handicrafts etc.
- This project will help in planning a trip with more ease.

## OBJECTIVE

To develop a web-based application which includes information about:

- Hidden gems of the city.
- Best food options available.
- Handicrafts and famous art and crafts.
- Places to visit and timing to each place.

## METHODS

- Analysing all the government website and third party websites.
- Collecting all the useful designs , data from the above websites.
- Developing a website with all the crisp data and exact links
- Tailoring end user experience with cross platform capatability .

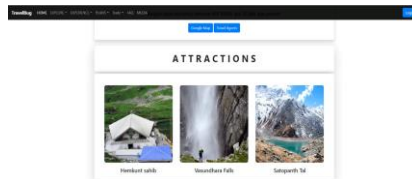

Tourism is a major source of income for Uttarakhand. The Uttarakhand government wants to create a tourist friendly application which supplies the details of all-important places to visit in the state and all information about the weather of that place. This initiative would bring out boost in tourism and help tourists to plan out their trip. It will help tourists get information about the availability of stay and lodging at the hotels.

## TECHNOLOGY USED

- ❖HTML & CSS : Providing basic structure to the website.
- ❖Bootstrap: Styling of website is done by Bootstrap.
- ❖Java script : Providing dynamic interface to the user
- ❖My Sql & PHP: For maintaining the database of the website

## RESULTS

This application is built with a purpose to increase tourism in Uttarakhand. The outcome of this project will be a web application which will help the visitors and the locals of the Uttarakhand to get the related information about everything they need during the whole trip. This will make it easy for the tourists to plan their trip and travel to more places. The ease of planning trips to various places in Uttarakhand will promote more people to visit Uttarakhand and explore more places. This application also supplies information about the famous local food and handicrafts. This initiative will help to popularize local products among tourist and supply employment to the locals.

## CONCLUSION

This application aims to cut the problems arising during an Uttarakhand trip due to lack of knowledge about the state. The application enlightens users about the famous and interesting tourist spots. The application will recommend the user with a list of best tourist spots, adventure activities, hotels, restaurants, and the regional cuisine to try. Users can use this application to plan an entire trip.
